Colour: blue, white

The fabric complies with the strict regulations on the flammability of bedding and development of toxic gases in hospitals and prisons according to

- DIN EN ISO 12952-2 2011

- DIN EN ISO 12952-1 2011

- ABD 0031:2014, AITM 2.0007, AITM 3.0005

Protective gloves

The gloves are always used when the motorical function of the hand and not the freedom of movement of the affected person must be limited.

This can prevent the penetration of body orifices such as nostrils or ears.

The aggressive or autoaggressive behaviour can be influenced by the use of the gloves. The gloves are available in 4 different versions which, depending on the requirements, limit the motor function of the hand accordingly.

Variations: Fabric Gloves, Fabric Gloves Soft Plus, Fabric Gloves Plus, Fabric Gloves Buffer
