

Coverall

tear-, bite- and puncture resistant up to 350N

Material: 95% Polyamid, 5% Lycra® - 650 g/m²
hydrophilic (sweat absorbent) and antibacterial

Itemnumber: RF-X-LL-b

Size: 44-62

Colour: blue, white

The fabric complies with the strict regulations on the flammability of bedding and development of toxic gases in hospitals and prisons according to

- DIN EN ISO 12952-2 2011
- DIN EN ISO 12952-1 2011
- ABD 0031:2014, AITM 2.0007, AITM 3.0005

Coverall - Protective suits for patients

The coveralls have a zipper on the back with a tab for fixing buttons.

There are additional eyelets at the ends of the sleeves and legs for attaching fixing buttons, to prevent the overalls from being pulled out.

The seams are made with extra strong Serafil threads and thus offer effective protection against tearing of the clothing.

The use of the coverall can reduce or even eliminate the need for other more drastic freedom-restricting measures.

In combination with other protective products such as gloves or helmets, the protective clothing can be gradually adapted to the patient's aggressive or auto-aggressive behaviour.

The freedom of movement remains largely intact.

Variants: short coveralls, short-sleeved coveralls, custom-made or made-to-measure on request at extra charge possible
