

Patient protection gown

tear-, bite- and puncture resistant up to 350N

Material: 95% Polyamid, 5% Lycra® - 650 g/m²
hydrophilic (sweat absorbent) and antibacterial

Item number: PSH-X-K-b

Size: 24- 31, 44-62

Colour: blue, white

The fabric complies with the strict regulations on the flammability of bedding and development of toxic gases in hospitals and prisons according to

- DIN EN ISO 12952-2 2011

- DIN EN ISO 12952-1 2011

- ABD 0031:2014, AITM 2.0007, AITM 3.0005

Patient protection gown

If isolation of the patient is necessary but not possible due to self-harming behaviour, the patient protection gown can be used. The seams are made with extra strong Serafil threads and thus offer effective protection against tearing.

Unlike normal clothing, the protective garment largely prevents the possibility of preparing suicide or assault tools.

It can help to replace a fixation with insulation.

A permanent guard is no longer necessary and video surveillance allows more distance.

Contact between the staff and the patient can be reduced to a minimum.
